Washers

Av-Tech Industries is committed to providing parts that meet our customers' requirements. Av-Tech adheres to a Quality Management System that promotes Process Integrity and Product Traceability which is the backbone of our organizational philosophy. The company was founded with the idea that we could effectively and efficiently procure and process parts within the scope of our customer's specific requirements. Av-Tech can provide a variety of inspections and also supports Source Planning for those customers who require on-site Source Inspections. Av-Tech, a Division of Fastenal Company, is continuously attempting to broaden its capabilities to ensure growth through customer service.

CAPABILITIES

- Full line of inspection equipment calibrated per ISO10012-1 & ISO/IEC 17025:2005
- Form, Fit and Function inspections upon receipt of all Mil-Spec hardware to NAS, MS and AN standards, Customer specific drawings, etc. (3rd party verification inspection upon request)
- First Article Inspection capabilities, when required, per AS9102.
- Ability to upload all documentation to customer specific portals
- In-House packaging of hardware to meet customer requirements.
- Custom Kitting
- Secondary Operations in place to patch, plate or process per customer requirements and approved APSL.
- Customer specific packaging/labeling/shipping requirements.

CASE STUDY

"Fastenal has been the production fastener supplier for Cirrus Aircraft for over three years. Their expertise in fasteners and point of use distribution has both increased our productivity with more immediate access to product as well as saved us money through inventory reductions, identifications of obsolescence and sourcing strategies. Fastenal is a strategic supplier to Cirrus Aircraft for all of our fastener production and maintenance needs."

*-Rick Hollander,
VP Manufacturing & Supply Chain,
Cirrus Aircraft*
